EZ PARTNER

UNIVERSAL API
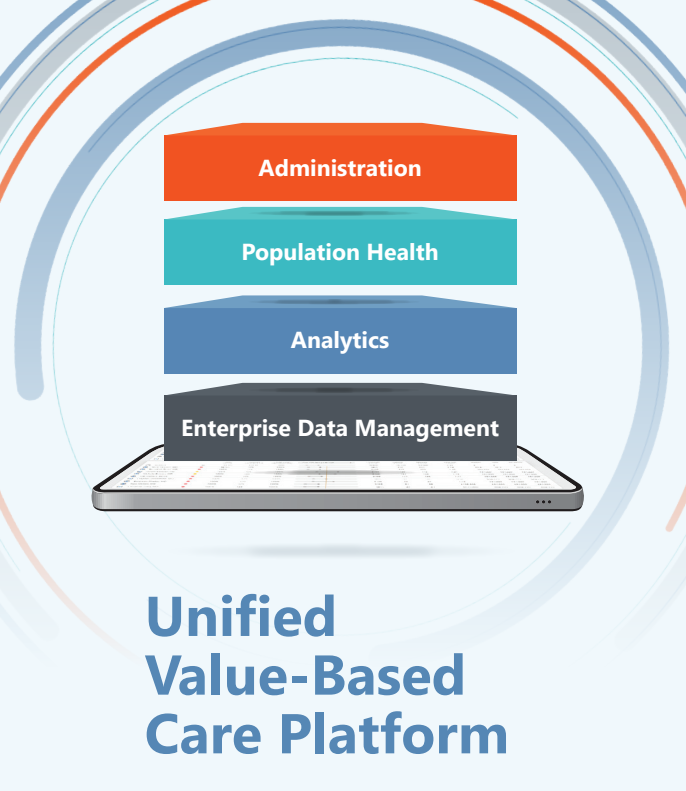

Innovate to Thrive in Today's Risk-Based Market

This application enables software vendors to interface existing systems with EZ-CAP. This Application Programming Interface (API) is an expert modification tool for developers to format request and response file transactions.

ACCESS DATA WITH SEAMLESS INTERFACING

This application enables software vendors to interface existing systems with EZ-CAP. This Application Programming Interface (API) is an expert modification tool for developers to format request and response file transactions. Vendors continue to offer users one point of entry through their systems, while seamlessly integrating the EZ-CAP managed care capabilities with no visible transitions.
